By founding of M & B Calibr, spol. s.r.o. in 1991, with determination we started to realize the idea and started to build a company, at that time, with a unique focus. Focusing on providing metrology services and opening a calibration laboratory.

In 2002, we successfully passed the accreditation process and since then we have been an accredited calibration laboratory No. 2301 according to ČSN EN ISO / IEC 17025 in the following fields: Length, pressure, torque, force, weight, temperature, humidity, straight surface and angle, roughness, hardness and speed.

Our goal is to be a professional and reliable partner with quality services covering needs across metrology. From sales advice through to calibration, service care, custom metering, or production of special prototypes to training through certified training. We are constantly working on increasing the measurement ranges and the range of services provided, as well as to offer our services with as little uncertainty in measurement as possible.

An important period in the development of our company occurred in 2005 and 2006, when we moved into our own newly renovated office building, and started the evolution of our machinery and bought the first 3D measuring machine. From 5 employees, our ranks have grown to 12 employees. In 2012, we built a new two-storey hall for calibration laboratories and in 2013 we opened the only M3 Cube Solution Center MITUTOYO in South Moravia. Our Mobile Calibration Laboratory, which is still a unique thing with its design, has expanded our service offer in 2014.

We built a new training center in 2015 and expanded the calibration laboratory equipment by purchasing a high-precision measuring instrument called Mahr with a measurement uncertainty of 0.09  $\mu\text{m}$ .

In 2019 our team consists of almost 40 people with a commitment to develop our company. Our accredited calibration laboratory is still at the top of the most advanced laboratories in Central Europe.

**Since 1991 we are committed to be your best partner in the field of measuring technology.**

We thank all our faithful clients, for us it is binding and motivating.

**Working with us means working with a team of professionals with years of experience who are doing their work with determination and heart.**

15. Mobile calibration laboratory			Price without VAT
15.1	Transport   km		0,6 €
15.2	Stay of technician per day		7,8 €
15.3	Accommodation		According to realistic costs

**General conditions for running a mobile calibration laboratory at the customer**

The accreditation certificate is also valid for the mobile laboratory, see Appendix to the Accreditation Certificate.

Calibration pricelist for mobile laboratory is the same.

Ensuring transport of calibration technicians to the accommodation.

Securing a parking space for the mobile calibration lab at least 250x700cm on a flat surface.

The mobile laboratory is equipped with its own power source and its own air conditioning and heating, and the laboratory is fully self-sufficient.

In case of a small number of gauges, a handling fee of 120 EUR / hour is charged.

# The mobile calibration laboratory

To make our services more efficient and supplemented, at the beginning of 2014, we have introduced an entirely new mobile calibration laboratory, which was designed according to the criteria required for calibration.

## Stable environment

The implementation of this laboratory was carried out by Fosan s.r.o., a certified manufacturer of ambulances. The material and technologies used meet the strictest criteria that allow us to provide a stable temperature in our mobile laboratory for the calibration of 20°C +/- 2°C.

## Awards For industry Awards

We introduced our Mobile Calibration Laboratory as a novelty at the For Industry Engineering Fair in April 2014, where we received the award for the best exhibit for this lab. This award has confirmed it was a good decision to go into this project and that our company is heading in the right direction.

## Realization of service

In order for better effect and minimize the time of the services provided, we are able to reach you directly in the production company and to calibrate the gauges in a minimum time horizon.

## In our mobile calibration laboratory we are able to calibrate the following fields:

- Length
- Pressure
- Temperature
- Weight
- Power moment
- Roughness

For specific mobile calibration options, consult our calibration technician. In case of your interest in mobile calibration Laboratory please do not hesitate to contact us by email: [obchod@mbcalibr.cz](mailto:obchod@mbcalibr.cz) or by phone: **+420 546 434 700**

We are an accredited laboratory No. 2301 according to ČSN EN ISO / IEC in the following fields: length, pressure, force, weight, temperature, humidity, plane and angle, roughness, hardness and speed.

Management automation and maintenance of measuring equipment

Outsourcing

COMING UP WITH INNOVATIONS

**KALIBRACE-ONLINE.CZ** = complete online administration and overview of necessary data for measuring instruments and measuring equipment. Automate and streamline records of gauges, including history.

**By using the online calibration application, you can:**

1. Online overview of your measuring equipment and the necessary calibration dates.
2. The automated reminder of the upcoming calibration date will be sent directly to your email.
3. A nice bonus is the 3-click calibration ordering system, including the choice of transport, such as our regular free gauge collection. Check with us if your business is on our pickup route.

**Online calibration application (www.kalibrace-online.cz) will replace the necessary administrative tasks, saving you time and finance significantly.**

How do I access the online calibration application?

To use the Calibration application, our customers must to set up an account via registration (www.kalibrace-online.cz). Usage for our customers is FREE.

By working with us, you will have exclusive benefits: Access to CALIBRATION ONLINE, 1st online metrology consultancy, collection and delivery, interesting price deals.

Kalibrační laboratoř (Calibration Laboratory)

Scope of accreditation:  
Calibration of meters of length, plane angle, roughness, pressure, moment of force, force, temperature, humidity, hardness, mass and rotational speed to the extent as specified in the appendix to this Certificate.

This Certificate of Accreditation is a proof of Accreditation issued on the basis of assessment of fulfillment of the accreditation criteria in accordance with

ČSN EN ISO/IEC 17025:2005

In its activities performed within the scope and for the period of validity of this Certificate, the Body is entitled to refer to this Certificate, provided that the accreditation is not suspended and the Body meets the specified accreditation requirements in accordance with the relevant regulations applicable to the activity of an accredited Conformity Assessment Body.

This Certificate of Accreditation replaces, to the full extent, Certificate No.: 413/2011 of 18 October 2011, or any administrative acts building upon it.

In 1991, we opened a calibration laboratory and in 2002 we went through an accreditation process. Since 2002 we have been an accredited calibration company.

Our main ambition is to be our customers' certainty. Certainty that they have chosen a partner who not only claims to be a professional and is one of the best in the industry, but has his claims checked by an independent institution and goes through quality certifications.
