

Special bonus package

Digimar 817 CLM 600 mm + Probe Set 817 ts2

Height measuring instrument for speed, reliability and precision

Quickly and yet reliably and precisely – this is how our Digimar 817 CLM height measuring device operates. Thanks to its extensive measuring and evaluation functions, the 817 CLM is an integral part of every production and quality assurance process. In daily use, the height measuring device scores with its freely swiveling, ergonomic operating and display element and the patented „Quick Mode“ – fast measurement by hand, the innovative solution from Mahr. The additional probe set allows for a wide variety of applications.

Top features:

- Wide range of measurement functions in 1D or 2D (optional)
- Dynamic measurement functions with the analog display
- Automatic perpendicularity and straightness measurements (in conjunction with optional accessories)
- Automated measuring procedures (measurement programs)
- Auto function for chain measurements and distance measurements
